NEW CLUTCH SETS

Brute Power is the leader in the New Clutch Set market, with more sets than any other manufacturer. You can cover your needs for Import and Domestic cars and light trucks. Let us show you how to be a leader with Brute Power instead of a follower with your present clutch program.

NEW FLYWHEELS

Perfection has a new flywheel program that will offer coverage of over 90% of new clutch set sales. The program gives you an alternative to re-surfacing your old flywheel at competitive pricing. New flywheels help reduce clutch warranty claims. It also eliminates problems that contribute to the old flywheel being too thin from machining. A new flywheel also means there is no core charge or core rejection. All Perfection flywheels are developed in Timmons ville, SC and built and tested to OEM specifications. To date, Brute Power has 104 (and growing) flywheel part numbers available for sale as part of this program.
